125 NEW SMALL HOMES

designed by

R·C·HUNTER·ARCHITECT

Complete Working Drawings Available

- The houses shown in this collection give the prospective homebuilder a wide variety of styles and floor plan arrangements from which to choose a home best suited to his needs.

- To make the service complete, working plans and specifications for each house are carefully prepared, and may be obtained for twenty-five dollars.

- Complete information will be gladly furnished to those desiring special plans and specifications or architectural supervision.

• 125 NEW SMALL HOMES

- Picturesque in its composition, the English cottage style might appropriately be arranged next to our own Colonial style, for the early work of the American colonists strongly shows the influence of English precedence.

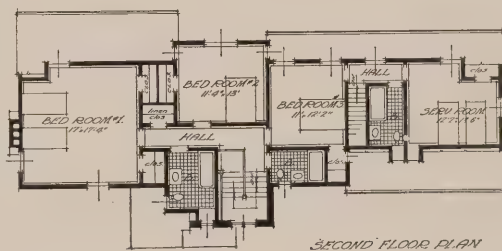

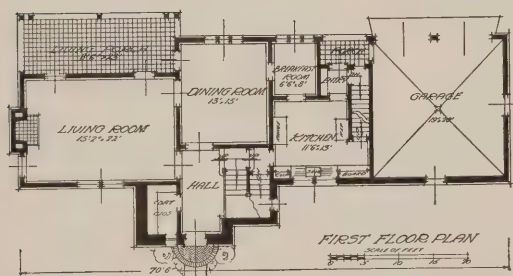

- The climatic conditions of the greater part of our country are not unlike those of England thus the style is thoroughly adaptable to our own country homes.

- Often the English style can be more successfully adapted to a rugged and irregular site than can our true American Colonial style.
